

Kameron Bui

University of Washington student intending to major in Informatics with a minor in Data Science. Interested in data science and software development, with a strong desire to learn and grow in dynamic, collaborative environments. Focused on building technical skills and contributing to impactful projects that address real-world challenges. Seeking a Summer 2025 internship to gain hands-on experience, expand knowledge, and make meaningful contributions to a forward-thinking team.

PROFESSIONAL EXPERIENCE

Hackathon Participant - WINFO Breaking Grounds Hackathon 2025 **January 2025**
University of Washington

- Designed a mobile app prototype to help users make friends through sports in new locations
- Created user flows, wireframes, and high-fidelity UI in Figma
- Conducted user research and integrated a gamified onboarding process for engagement

Buildspace Fellow, Cohort 2 **October 2024 - December 2024**
University of Washington

- Created an online time capsule for students at the University of Washington to capture moments and milestones from university using HTML, JavaScript, CSS, Firebase, Figma, etc.

Software Developer Intern, Metadata Solutions **July 2024 - August 2024**
Ho Chi Minh City, Vietnam

- Built a hotel booking system with Django, designing relational database schemas and layered client-server architecture
- Developed and tested RESTful APIs with location and room filters, securing endpoints with JWT authentication
- Styled pages using Bootstrap and flex box rendering database information on static HTML
- Participated in daily standups and refined specifications to ensure project alignment

Coding Instructor, Code Ninjas **June 2021 - February 2023**
Newcastle, Washington

- Held coding session for children ages 7-14, covering JavaScript, C++, and Python fundamentals in a fun, supportive environment
- Assessed individual skill levels, provided feedback to parents, and created a positive space for learning and growth

Business Intelligence Engineer Intern, Aptive **August 2022 - September 2022**
Environmental Provo, Utah

- Build dashboards in Sigma for clients, troubleshoot reporting issues, and create insights into demographic sales performance
- Support teams in data creation, manipulation, cleansing, and collaborating with leadership to meet reporting needs and improve data quality

Web Development/Data Science Scholar, Kode With Klossy Remote **July 2019 - August 2019**

- HTML, CSS, JavaScript, Python, SQL, BI Tools

SKILLS

- Collaboration, Problem-Solving, Agile Development Practices
- Data Analysis, Visualizations, Dashboard Development, Relational Database Design
- Firebase, Sigma, Django, Bootstrap, RESTful APIs, JWT Authentication
- R, Python, Java, JavaScript, SQL, HTML, CSS
- Tableau, ATLAS.ti
